

EcoClear

**Advanced Additives
for Plastic Packaging**

Solution Package

Tex explore innovate **advanced additives for plastic** to provide **superior performance** and **sustainable solution** such as mono-material and recyclable

Benefit of Using EcoClear:

Product Highlight:

Clarifying masterbatch additive for polypropylene

Anti-fogging agents coating additive for thermoforming food packaging

EcoClear-PP

It is the **clarifying agent masterbatch** to promote **higher clarity & gloss, good stiffness and increase in-house recycled content** of polypropylene (pp) packaging.

Customer can also apply **EcoClear-PP series in 100% mono-material packaging** for sustainable solution, fully recyclable and potential cost saving as well as carbon footprint reduction.

Application : Polypropylene (PP) packaging

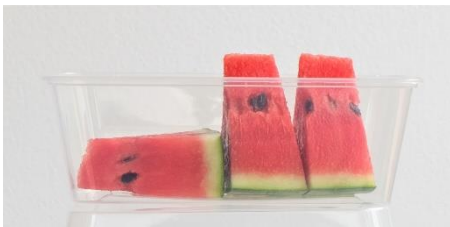

Performance : Clarity Improves 20 – 60%

EcoClear-PPG

Light Gray

Polypropylene (PP) + **EcoClear-PPG**

Polypropylene (PP)

EcoClear-PPN

Natural

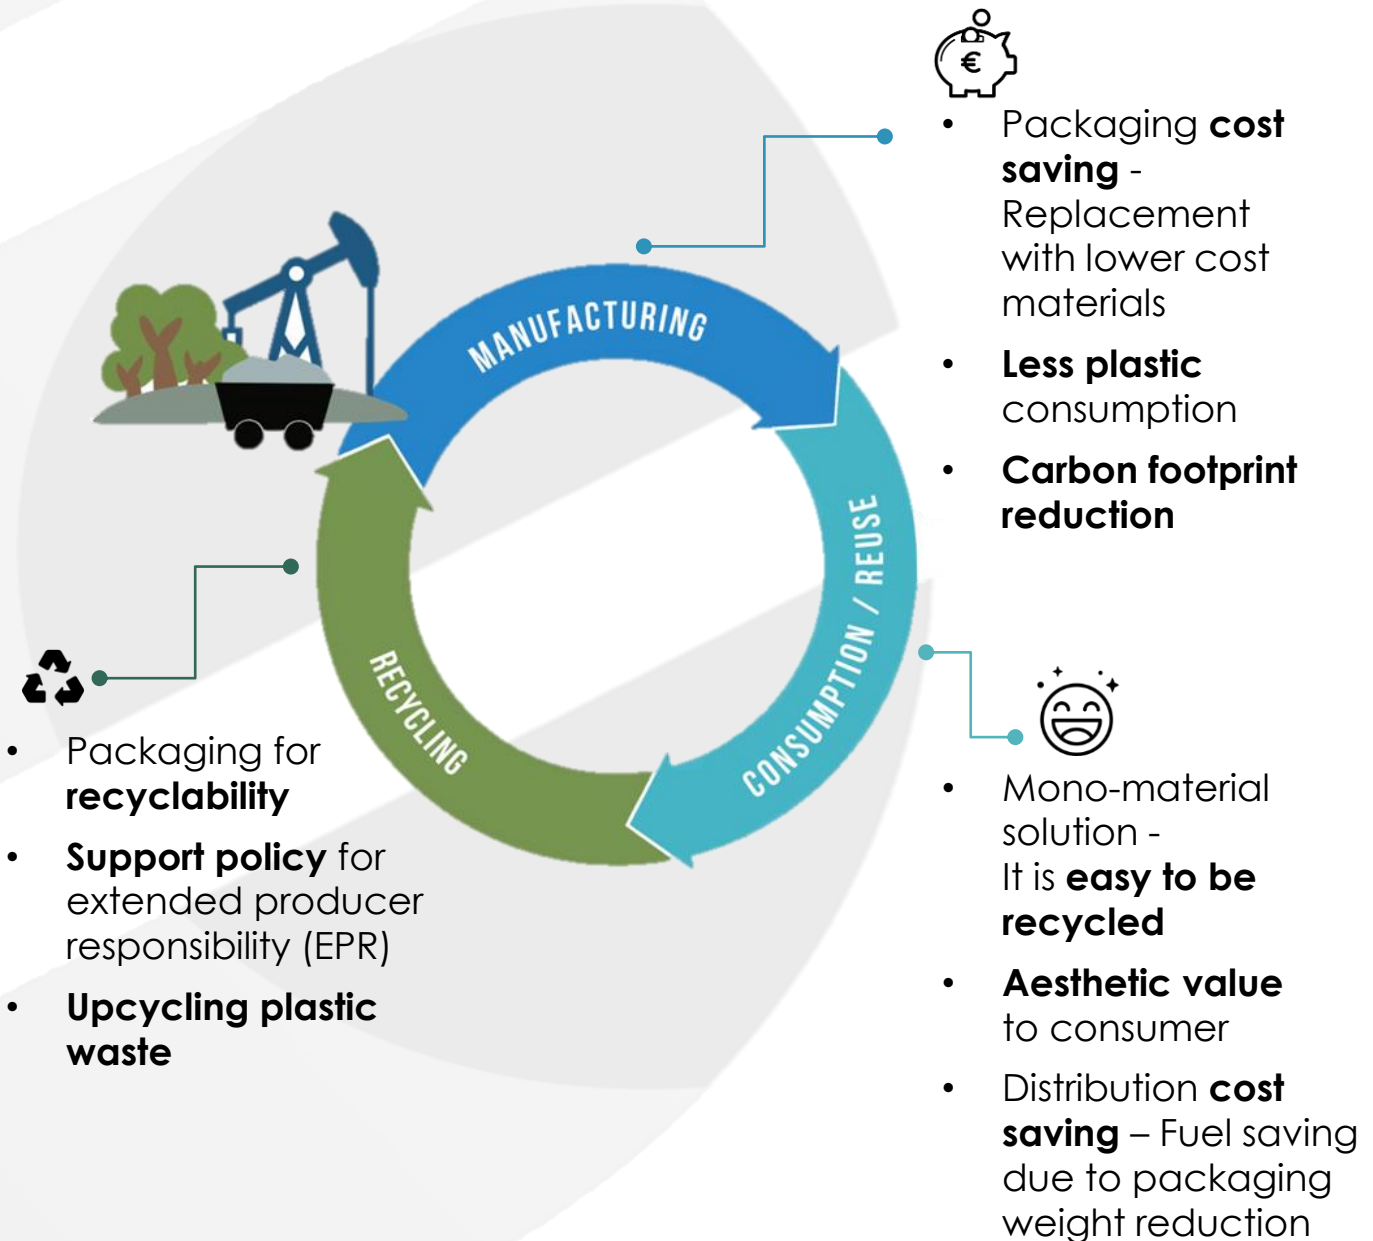

Polypropylene (PP) + **EcoClear-PPN**

Polypropylene (PP)

As circular economy aspect, EcoClear-PP also **supported “Sustainable Theme”** along manufacturing, consumption, and recycle processes

EcoClear-AF

It is the **water based coating Anti-fogging agents agent** with highly efficient prevent **both Cold fog & Hot fog** for versatile **thermoforming food packaging (PET & Clear PP)**

Coating solution will provide **better Anti-fogging agents efficiency** over masterbatch due to slow migration to the surface of Anti-fogging agents in masterbatch form

Application : Thermoforming food packaging (PP & PET)

Performance : Provide better visibility of contents inside of the packaging.

EcoClear-AF

Thermoforming food packaging + **EcoClear-AF**

Thermoforming food packaging
